## Chapter 1: Choosing the Right Hardware and Software

The first step to urban sketching with a tablet is to choose the right hardware and software. There are a few things to consider when making your decision:

- **Tablet size:** The size of your tablet will determine how easy it is to carry around and use on the go. A smaller tablet is more portable, but a larger tablet will give you more drawing space.
- **Tablet resolution:** The resolution of your tablet will determine the quality of your sketches. A higher resolution tablet will produce sharper lines and more detailed images.
- **Stylus:** The stylus is the pen you will use to draw on your tablet. There are a variety of styluses available, so it's important to find one that is comfortable to use and provides the right level of precision.
- **Drawing software:** There are a number of different drawing apps available for tablets. Some of the most popular options include Procreate, SketchBook, and Adobe Photoshop Sketch.

## Chapter 2: Getting Started with Urban Sketching

Once you have chosen the right hardware and software, you're ready to start urban sketching. Here are a few tips to get you started:

- **Find a good location:** Choose a place that is interesting and inspiring, but also has plenty of natural light.
- **Take your time:** Don't try to rush your sketches. Take your time to observe your surroundings and capture the details that make the scene unique.
- **Use a variety of drawing tools:** Most drawing apps offer a variety of brushes and tools that can be used to create different effects. Experiment with different tools to find the ones that you like best.

- **Don't be afraid to make mistakes:** Everyone makes mistakes when they're learning to draw. The important thing is to learn from your mistakes and keep practicing.

## Chapter 3: Advanced Urban Sketching Techniques

Once you have mastered the basics of urban sketching, you can start to experiment with more advanced techniques. Here are a few tips to help you take your sketches to the next level:

- **Use layers:** Layers allow you to build up your sketches gradually, without having to worry about making mistakes. This can be especially helpful for complex sketches.
- **Add color:** Color can add a lot of life to your sketches. Experiment with different colors and brushes to create unique and eye-catching effects.
- **Use perspective:** Perspective can help you create the illusion of depth in your sketches. This can be especially effective when sketching buildings or other structures.
